## INTRODUCTION

Chess players through the ages have derived particular pleasure from victories achieved in short order. This is a collection of 200 recent chess miniatures (games ending in 25 moves or less) derived from the King's Gambit Declined (1.e4 e5 2.f4, without 2...exf4).

The King's Gambit, 1.e4 e5 2.f4, offers a pawn to Black in order to build a strong center for White. There are two main branches of the King's Gambit. Black has a choice of accepting the pawn offer (1.e4 e5 2.f4 exf4) and playing the King's Gambit Accepted (KGA), or declining the offered pawn. This book concentrates on the lesser-played King's Gambit Declined (KGD).

The King's Gambit is one of the oldest documented openings, going as far back as the 16<sup>th</sup> century. The King's Gambit is less frequently seen on the top level nowadays, although grandmaster Magnus Carlsen, the world's highest rated player, recently played it in 2010 as White and won against grandmaster Wang Yue, ranked number 10 in the world.

The King's Gambit has not been refuted, and several grandmasters continue to use it. The opening is more frequently seen in club play or in correspondence games or on the Internet as a sound gambit. The King's Gambit is still appealing to aggressive players who like exciting open games.

While accepting the gambit pawn may be best, there are quite a few good variations in the King's Gambit Declined that give chances for Black. White must be careful to avoid the many chess traps in the KGD. The KGD requires a thorough understanding of many tactical variations as well as sound positional play for both sides.

The Classical Defense in the KGD is 1.e4 e5 2.f4 Bc5. The Encyclopedia of Chess Openings (ECO) classifies this opening as C30, along with other irregular second moves by Black. Black can also play 1.e4 e5 2.f4 d5, the Falkbeer Counter gambit (C31). The main line in the Falkbeer Counter gambit is 1.e4 e5 2.f4 d5 3.exd5 e4 (C32).

In this collection of King's Gambit Declined games, almost every game mistake is swiftly punished – and thus this collection may be studied as a source of opening traps and lines to be avoided, or merely as a series of tactical games to be enjoyed. Furthermore, the collection of most recent KGD games also shows the latest trends in this opening by players.

Every game has light annotations for improved play or explanation. Also, every game has a diagram, usually after a mistake or error has been played that can be exploited and punished. The games represent play of all strengths, from grandmaster to woodpusher from all over the world.

Enjoy.

# King's Gambit Declined Miniatures

Bill Wall

The King's Gambit is one of the oldest documented openings, going as far back as the 16<sup>th</sup> century. . There are two main branches of the King's Gambit. Black has a choice of accepting the pawn offer (1.e4 e5 2.f4 exf4) and playing the King's Gambit Accepted (KGA), or declining the offered pawn. This book concentrates on the lesser-played King's Gambit Declined (KGD). In this collection of King's Gambit Declined games, almost every game mistake is swiftly punished – and thus this collection of 200 miniatures from players all across the world may be studied as a source of opening traps and lines to be avoided, or merely as a series of tactical games to be enjoyed.
